WORK EXPERIENCE

Full-time
@ PI Marketing 📍 Tangier, Morocco

Present

Interim Dev Team Lead

`Java` `Spring Boot` `Postgress` `Percona`

Jun 2024

Mid Level Software Developer

`Laravel` `Inertia` `React` `Redux` `Docker` `Redis` `Tailwindcss`

Jun 2023

Junior Software Developer

- Designed and built full stack applications using an appropriate technology stack based on the specific needs and goals of the software.
- Reduced the complexity of the existing software by writing libraries, micro frameworks and refactoring the code base.
- Developed VPS and cloud storage applications for various cloud providers, including DigitalOcean, Linode, IBM, AWS, and others.
- Developed many software related to network protocols (e.g. DNS lookup and enumeration, SMTP/IMAP testers, subdomains enumerators ..) with Python/PHP.
- Used Microsoft Graph Powershell, Azure Powershell, Azure Az PowerShell modules in PowerShell scripts to automate tasks for production teams.
- Production servers administration : setup SSL certificates, firewall configuration (iptables), SSH configuration, users administration, automate tasks with Linux Cron jobs.
- Used Microsoft Graph REST API to connect and manipulates resources on Azure Active Directory.
- Build and maintain a chrome extension for login process automating used by production teams.
- Write documentation of the developed software (Usage and setup guidelines).
- Working on the existing software and providing new features continuously.
- For version control we use Git and Bitbucket.

`PHP` `Python` `NodeJS` `ES6` `React` `Alpine` `Webpack` `Rollup` `Sass` `Slim Framework`
`Linux` `Shell Scripting` `Git` `Apache` `MySQL` `Cloud Computing` `Cloud Storage` `Azure`

November 2021

Paid Internship
@ [Map]concepts 📍 Tangier, Morocco

June 2021

Full-stack Developer

- Developed a web application in Laravel to manage invoices for companies, and allows exporting invoices and estimates into PDF documents with a dynamic company stamp.
- Developed many SEO-friendly websites with Laravel and Voyager Admin for back office.
- Maintained and added new features to an existing C# application used for ticket reservation.
- Ensure the developed websites are responsive on mobiles and tablets.
- Web Scraping using the cURL extension of PHP.
- Created design mockups with Figma and Adobe XD.
- Web Integration of design mockups with HTML and the Bootstrap framework.
- Helped my team members with solving coding problems and making technical decisions.
